

Comune di VALBREMBO

PLEASE PRESENT THE ORIGINAL DOCUMENT AT THE COUNTER

Dear Fellow Citizen, Respected Company,

starting from April 2025, an important innovation will be introduced: the collection of dry waste must take place with the new gray containers, equipped with an identification tag.

Nothing will change for the separate collection of other fractions such as organic waste, plastic packaging, paper, glass and cans which will have to continue to be collected and displayed as always.

Just as nothing will change for the collection days, even for the undifferentiated fraction, which remain those indicated in the 2025 collection calendar.

The new containers must be collected from all users at a COUNTER which will be specifically set up IN THE MUNICIPAL AUDITORIUM IN VIA DON MILANI CIVICO 6.

TO allow us to better manage the influx of people, we recommend coming to collect the containers USING ONE OF THE TWO FOLLOWING DEDICATED APPOINTMENTS

:

IL GIORNO _____ DALLE _____ ALLE _____

OR

IL GIORNO _____ DALLE _____ ALLE _____

PROVIDED WITH YOUR ORIGINAL LETTER

If you are unable to reach the delivering point on the above timetable, you can delegate another person by the DELEGATION section present at the end to this document.

For citizens residing in CONDOMINIUMS managed by an Administrator, contact him to define the new configuration of the conferring spaces. The new collection includes a bin for each TARI taxpayer, therefore each citizen will display his own bin.

Comune di VALBREMBO

Also, at the distribution desk it will be possible to request and collect the special bin for the provision of HEALTHCARE ASSISTANTS for children up to 3 years of age and for adults who use them regularly (diapers, catheters, hygienic underpads, ostomy bags).

For those entitled, it will be sufficient to complete and present a special self-declaration available in paper form at the counter or an electronic copy can be downloaded at the following address: www.comune.valbrembo.bg.it.

The new collection method, in addition to allowing for a more orderly and cleaner delivery, has as its objective a better differentiation of waste and greater fairness, as it will allow the Municipal Administration, once the experimental phase is over, to adopt a new calculation of the tariff, based on the actual number of emptyings of the containers of each individual user: the charge, in essence, will be proportionate to the actual production of unsorted waste.

The commitment of those who better differentiate their waste and those who undertake to produce less, also by changing their purchasing choices and consumption habits in order to achieve greater environmental sustainability, will be concretely recognised.

We thank you in advance for your precious collaboration and sharing of attention to environmental protection.

Signed by

THE MAYOR
Veniero ARRIGONI
